

COMPANY PROFILE

Oil Man for Oil and Gas Fields Industries and Services L.L.C.

P.O. Box 133164, Abu Dhabi, United Arab Emirates

Phone: 02-6222233 Fax: 02-6222232

E-mail: info@oilman.ae, Web: www.oilman.ae

ISO 9001:2008 Cert. No. 729835

1. OIL MAN PROFILE

1.1. Introduction

Oil Man is one of the well-established companies in UAE with highly qualified personnel with an experience in the oilfield industry dating back to 1971 that stretches to all the UAE, GCC and Middle East markets.

Our company is headquartered in Golden Tower, in the Corniche district in Abu Dhabi. We represent a number of international manufactures and oilfield companies. Our warehouse facility is located at Mussafah industrial area; which operates as our main workshop and supply base.

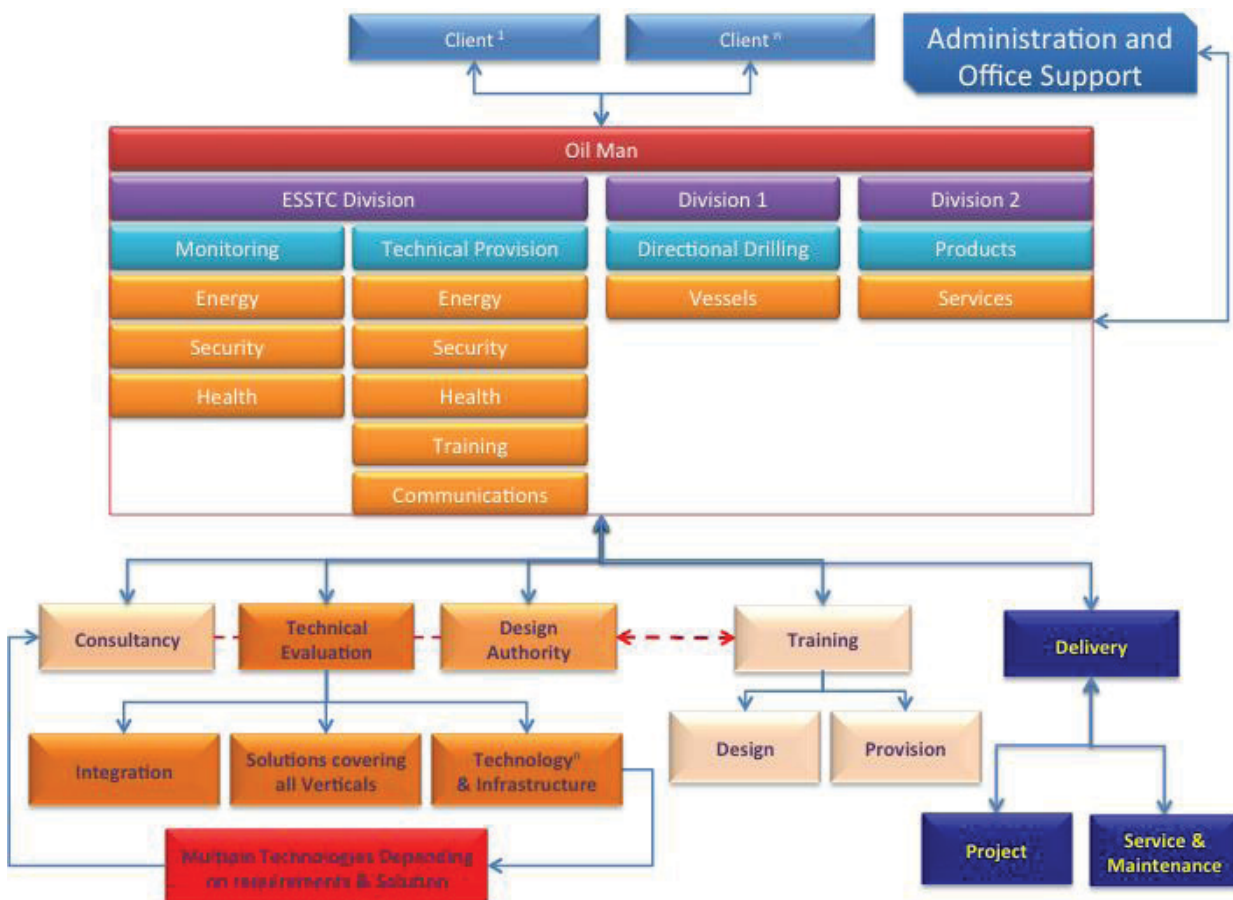

We are a 100% local UAE owned company. We work with Abu Dhabi National Oil Company (ADNOC) and all its group of companies for providing our supplies and services for both onshore and offshore oil fields, throughout the UAE. In addition, we are also working with a large number of non-oil and gas organisations with the capability to supply across multiple sectors.

OIL MAN has gained significant presence within the UAE and have a number of opportunities in the Wider Middle East. Our members of staff have up to 40 years work experience in the United Arab Emirates (individually) and much more than this as a group

Oil Man has the following divisions and our team have extensive experience working with major organisations within the Middle East:

- a. Energy, Security, Safety, Training and Communications
- b. Drilling
- c. Products and Services

The chart below provides an overview of the Oil Man organisation:

g. For our projects we use the above model and bring world leading technologies, solutions and experts to the region, which delivers our clients the best and most appropriate solutions currently available.

2. Oil and Gas Experiences

As mentioned above, we are registered with a significant number of the ADNOC group of companies.

2.1 Other Current Experience

Outside of the Oil and Gas vertical, we are conducting significant effort, specifically and currently within the integration and optimisation of BMS, SCADA and security systems for multiple organisations such as:

- a. Construction
- b. Education
- c. Facilities Management
- d. Finance

2.2 EPC Experiences

We have strong relationships with many EPC companies, locally and internationally, a few of the major organisations/companies are listed here:

- a. PETROFAC,
- b. TECHNIP,
- c. CCC Chiyoda,
- d. Target Engineering Abu Dhabi,
- e. Dodsall
- f. Computer Network Logistics (CNL)
- g. Energy Solutions Group International (ESGI)

In order to achieve the best results, we have always ensured the use of our best resources and standards to deliver to our esteemed clients the best of our services. We are proud to state that we did not have any serious failures or mishaps since our company has been established.

3. What we do - Products and Services

3.1 Drilling Division:

1. Our team of professionals and cooperating partners are ready to apply years of experience to any directional drilling request, and in particular any 'extremely-challenged' prospect.

The Oil Man Drilling Solution, guarantees reliability through systematic planning, extremely competent and experienced personnel, and unsurpassed leading edge technology coupled with 'partnered' in-house maintenance and manufacturing. All of this ensures that customers are provided with the highest quality tools and services in the industry.

Oil Man Directional Drilling Services serve a diverse range of projects, from deep-water wells in the Gulf of Mexico to a geothermal well in the Far East and a coalbed methane/coal seam gas well in India or a difficult horizontal in the Persian Gulf. Our diverse range of directional drilling expertise is paramount to the success of any project with our diverse regional experience coupled with our vast array of in-house navigation systems allows us to provide “fit for purpose” custom directional service packages for the most challenging projects. Our tools and sensors are designed for outstanding performance under severe drilling conditions including extreme temperature, pressure, well depth, dogleg severity, drilling shock and vibrations.

Oil Man Directional Drilling Services is well positioned to provide an unsurpassed package of customised services to fit any project anywhere in the world.

OUR FOCUS

- a. Strong leadership and vision
- b. High degree of discipline and integrity
- c. Performance

OPERATIONS

- a. Well Planning
 - i. Directional Well Planning
 - ii. Positional Uncertainty
 - iii. Anti-collision Analysis
 - iv. 3D Visualization
 - v. Field Data Management
 - vi. Plotting and Reporting
- b. MWD/LWD Systems
 - i. Meets or exceeds API standards
 - ii. Various systems to meet customer needs and applications.
 - iii. Specialty kits include; gamma, resistivity, Gamma@Bit
 - iv. Multiple battery applications for improved tool life
 - v. Pulsar and EM options available
- c. Technology & Products
 - i. Mud Motors from:- 3 1/2" to 11 3/4" OD) with various lobe configurations - high performance & up to 50% more torque and power
 - ii. Rotary steerable technology; push-the-bit and point -the-bit
 - iii. Drilling jars
 - iv. Anti vibration tools
 - v. Mechanical thrusters
 - vi. Straight & spiral blade stabilisers
 - vii. Roller reamers and double reamers
 - viii. Single blade fixed hole openers - inventories include sizes up to 26"
 - ix. Mag & non-mag drill collars & drill string
 - x. Speciality drilling bits
 - xi. Extreme resilience in difficult drilling environments

Operations support staff are on call 24/7, providing; additional engineering and technical support (where required), daily reporting, end of well reporting, digital or printed gamma logs.

Our company offers a wide range of supplies to the following industries:

- a. Drilling and Work-over Oil & Gas Operations
- b. Refineries

- c. Gas & Petrochemical Plants
- d. Power & Desalination Plants
- e. Building and Constructions
- f. Other Industries

Our sales team is specialized in supplying the following range of products & services:

- a. Drilling Rigs, Onshore / Offshore Packages
- b. Drilling Equipment and Expendables
- c. Oil, Gas, Marine, Labs, Mechanical, and Electrical Equipment and spares supplies
- d. Miscellaneous and General Equipment and spares supplies
- e. Full Range of Safety products, Gas Monitoring and Alerts in addition
- f. All types of Personal Protective Equipment (PPE)
- g. Project Equipment Sales, and Structural Steel
- h. Mud Chemicals, Production Chemicals, and Drilling Fluids
- i. Pressure Vessels, Tanks, Pipeline (water, gas, oil), Fabricated Structural, Furnace, Heat Exchanger, Coolers, H.P. Flow Line, Burner Boom) and much more
- j. Control and Monitoring Systems
- k. Tubular Handling Equipment & spares
- l. Completion and Sub-Assembly Equipment & spares
- m. Liner Hanger Equipment & spares
- n. Fishing and Milling Equipment & spares
- o. Web-Stock and it related Equipment & spares
- p. Through Tubing & Through Casing Equipment & spares
- q. Corrosion Monitoring and Cathodic Protection Equipment & spares
- r. Drilling Equipment & Tubulars Rental Services
- s. Industrial & Hydraulic Hoses - ALFAGOMMA, ITALY
- t. Stainless Steel Flexible Hose & Pipes - BENGAL INDUSTRIES, INDIA
- u. PVC Suction Hose, Oil Resistant Hose, Air Ducting Hose - PLEXACO, GREECE.
- v. SS Couplings for Breathing Hose - FOSTER, USA
- w. Hydraulic Hose, Fittings, Adaptors, Q.R. Couplings, etc. – Dunlop – UK
- x. Lifting – Materials Handling, Measurement and Control
- y. Wire Rope – all the types for the lifting items.
- z. Fire Extinguisher all sizes – Brand: Firex – Tri star
- aa. ENERPAC – All Types of Cylinders, Pumps, valves, presses, pullers, tools, bolting tools.

3.2. CASCADE SERVICE

HIGH-PURITY BREATHING AIR SERVICES

Preserving Life One Person at a Time

Full Product Line. Integrated Strategies.

Oil Man On-Site Safety Services is your single, most complete resource for all high purity breathing air services. From mobile air compressors to portable air trailers, supplied-air systems, high-pressure regulators and high-pressure manifold systems, Oil Man On Site Safety Services has the right equipment you need to provide a safe and healthful working environment. We also provide top-quality safety training for work processes, as well as fit testing, use training and maintenance for all equipment we supply. Oil Man On-Site Safety Services delivers the resources and expertise of Oil Man added to the Oil industry Safety heritage that you trust. Peace of mind. That's what you get with Oil Man On-Site Safety Services.

Fully Integrated High-Purity Breathing Air Services reduce costs, save time.

Our mobile trailers and comprehensive product line let us custom-tailor our breathing air services to your specific needs. Trailer-mounted, diesel-powered “Bauer” high-pressure air compressors provide air wherever it is needed. The compressor can refill cylinders on- or offsite, and our high -pressure systems are able to refill equipment up to 4500 psi.

Mobile Air Compressor Trailers

Eliminate the difficult lifting and moving of heavy cylinders with our mobile air compressor trailers. Provide high-purity Grade “D” breathing air on-site, with CFM for all needs and state-of-the-art filtering systems, using Oil Man On-Site Safety Services mobile air compressor trailers. Available in high-pressure and low-pressure systems.

Compressor

Air line respirator cascade systems supply breathing for prolonged periods in hazardous atmospheres, including IDLH, so you can rest assured when conditions get tough. Advanced filtering systems allow for the refilling of cylinders on or off site.

Portable Air Trailers

Oil Man On-Site Safety Services’ portable air trailers offer convenient, flexible and mobile compressed high purity Grade “D” breathing air in a range of sizes up to jumbo tube trailers. These cost-effective breathing-air supply systems allow your personnel to work comfortably and work longer. You also eliminate costly down time due to compressor failures or insufficient air supplies. Plus, there is no need to constantly move cylinders.

Flexible Air Options for greater mobility.

Supplied air, HP regulators and manifolds all provide convenient, flexible and mobile compressed high-purity Grade “D” breathing air. It all adds up to providing a safer, more comfortable working environment so your personnel are more productive.

Dedicated On-Site Monitoring and Breathing Air Services for greater efficiency.

Oil Man on site Safety Services' mobile trailer monitoring and breathing air services come right to your job site. This flexible "field office" helps reduce downtime while providing highly-trained safety specialists to monitor and service your safety needs.

Safety...and much more.

With an expansive national footprint and a comprehensive product line, industrial construction specialist expertise, Red-D-Arc® welding rental equipment, complete industrial gas resources and safety training programs, Oil Man On-Site Safety

Services provides the complete solution for all your on-site safety, MRO and gas supply needs. Dedicated On-Site Monitoring and Breathing Air Services for greater efficiency. Oil Mans On-Site Safety Services' mobile trailer monitoring and breathing air services come right to your job site.

Please contact us for the following services at your door step:

1. Refilling all type of breathing air cylinders.
2. Maintenance and inspections of breathing apparatus.
3. Calibration of all brands of single and multi-gas detectors.

3.3. Process & Analytical Division:

Primary functions are Supply, Installation, commissioning & Maintenance of Process & Analytical Instruments for Onshore, Offshore, Oil and Gas Operating Companies.

We offer complete turnkey solutions for all type of Analytical measurement systems. Our scope of work starts from plant survey, providing preliminary engineering and cost estimates, identifying the latest measurement techniques and Analyzer suppliers, sourcing these Analyzers and providing necessary support accessories, installing them at your site, undertaking all field related activity such as hooking up to plant utilities, checking for functionality, commissioning and putting it on operation, undertaking site acceptance tests, training the operation staff on maintenance and functionality of the Analyzer unit and finally supporting the operation staff through qualified and experienced engineers offering after sales service. In short we take complete responsibility from conception, implementation and finally supporting in maintaining the Analyzers for smooth continuous operation.

We provide complete Analyzer system with Sample Probes, Fast Loop Skids, Sample Conditioning System, Validation and Sample Recovery System for the below applications.

- a. Physical property analysis of Motor Fuels, detecting Flash Point, Pour Point, Viscosity, Density using ASTM Analyzers
- b. Total Sulphur Analysis of Motor Fuels, Natural Gas, Kerosene, Naphtha, Reformer, Isomerisation plant, and LPG
- c. Analyzer Packages for Blending of Motor Fuels with NIR, Total Sulphur, Physical Property, Viscosity & density Analyzers
- d. Steam and Water Analysis for Ph conductivity, dissolved Oxygen, ORP analyzer and complete SWAS packages
- e. Moisture Measurement with different techniques for Liquid & Gases
- f. Stack Monitoring System using in-situ, in-situ dilution, and hot extraction measurement techniques
- g. Process Gas and liquid Analyzers, including Mass Spectrometer and Gas Chromatograph
- h. Analyzer Package for Heater and Furnaces

Process Analyzer types:

- a. Boiling Point, Vacuum Distillation, Cloud Point Analyzer, Freeze Point, Pour Point, Colour, Viscosity, Salt in Crude & Reid Vapour Pressure Analyzer
- b. Process Gas Chromatographs
- c. NIR based Process spectrometer
- d. Zirconium Oxide, Paramagnetic & Electro Chemical O₂ Analyzers
- e. TCD based H₂ Analyzer
- f. Wobbe Index Analyzer
- g. UV based Analyzers
- h. SRU Analyzers
- i. Moisture & HC Dewpoint Analyzers
- j. H₂S Analyzer for Gas/Liquids
- k. Total Sulfur Analyzers for Gas/Liquids
- l. Density/Specific Gravity Analyzer
- m. pH, ORP, Conductivity, Dissolved Oxygen, TOC Analyzers

3.4 Personal Protective Equipment (PPE) and Safety

We are offering all ranges and brands of PPE from head to foot apparels that will suit different kind of needs from worker type to staff type.

- a. Helmets
- b. Face protections
- c. Safety glass
- d. Face Mask
- e. Ear Protector
- f. Safety Goggles
- g. Noise Protectors
- h. Disposable Coveralls (Normal, Chemical resistant and sterilized)
- i. Coverall (Cotton, Flame and Fire Retardant)
- j. Chemical Suits
- k. Winter Jackets
- l. Safety Jackets/ Vests
- m. Safety Harness
- n. Safety Belts
- o. Gloves (Cotton, Working, Leather, all types)
- p. Safety Shoes
- q. Rigger Boots
- r. Executive Boot

Oil Man is also offering all types and brands of below safety items and equipment

- a. Gas Detectors
(from single to multi gas detectors with warranties from 24 to 36 months)
- b. Breathing Apparatus
- c. Emergency escape units
- d. Fire Extinguishers
- e. Filling Machines
- f. Fire Alarm Systems
- g. Fire Blankets
- h. Fire Cabinets
- i. Fire Doors
- j. Fire hydrants
- k. Fire Pumps
- l. Fire Resistant Cables
- m. Fire Trailers/ Trucks
- n. Hoses
- o. Nozzles
- p. Warning Signs
- q. First Aid Kit

3.5. ESSTC Energy, Security, Safety, Training and Communications (ESSTC) Division

The ESSTC Division of Oil Man is a single source for all your Intelligent Integration, Monitoring Security, Energy, Communication and Training requirements.

We understand that the world of energy, security, safety, training and communications are developing at an unprecedented rate and with it comes new opportunities that we can help unlock and deliver. Whether it's blue-sky thinking, new technology or the aspiration to improve service and reduce plain old operational costs – all of our clients have a vision. Our client base include Governments and their Agencies, including Homeland Security, General Law Enforcement, Specialised Policing, Traffic Police, Border Control, Civil Defence, Ministry of Interior, Prison Authorities, Military and Emergency Services, Petro-Chemical Industry and High Value Iconic and Niche Clients.

Our unrivalled insight and expertise means that we can make technology work for you. Whatever your vision; we have the means to make it happen and alleviate whatever communications challenges you face.

All of our working relationships are based upon a series of core values:

People-Trust-Quality-Experience-Innovation-Stability-Agility

Delivering leading edge technologies to provide clients with future enabled ecoSystems and environments to maximise their operational capability, whilst managing costs and where practicable enabling efficient and effective use of technology and operational staff:

a. Intelligent Integrated Monitoring and Management Technology: Multi-faceted and intelligent integration of technology driven systems, including all systems and solutions below.

b. Building management (BMS), supervisory control and data acquisition (SCADA), building sustainability systems including 'chiller' plants and other Heating, ventilation and Air Conditioning (HVAC), lighting and electricity usable devices.

c. Security Consulting: A consultative-based approach with client stakeholders to provide clients with understanding of their current physical security provisions, improvements required and operational effectiveness and efficiencies, including providing risk and threat assessments, mitigations and providing solutions commensurate with operational needs and long term security.

d. Dedicated Integrated and Stand-Alone Security Products, Systems and Decision Support: Where practicable, Integrated Security Systems at the highest level, using appropriate Dynamic Physical Security Information Management (PSIM), Decision Support Centres, Fusion Centres and bespoke Systems delivering technologies commensurate with the threat and risk organisations face. In addition to Integrated Systems, the provision of stand-alone products and systems, complimenting security operations. Providing Decision Support capability across multiple facilities and ensuring appropriate workflow, handover and operations.

e. Safety and Safety Monitoring: Equipment and leading edge Health Monitoring Systems to enable organisation to be aware of their operators' health, well-being and location when appropriate, particularly for those operating in hazardous and dangerous environments. In addition to 'Systems', the provision of additional warning, health and safety equipment to enable operations to be conducted safely.

f. Specialist and Traditional Training: A gradual evolution from utilisation of organisations' own premises, transiting through a programmed development staged facility to a dedicated 'Training Academy', reaching multiple types of user, from day to day operational use of equipment to rapid response, triage and emergency planning and operations for global situations.

g. Diverse range of Communications: From in house telecommunications and network systems to remote area, fast deployable wireless systems, capable of delivering required communications at the point of need, whenever needed. Enabling and providing systems to conduct operations, including day-to-day and emergency wherever the need arises. The communications provision includes Data Centre design, procurement, implementation and operational management from Tier 1 through Tier 4 critical facilities.

Our Markets

- a. Oil and Gas ,Mining,
- b. Government, Military and Security
- c. Network Operators – Fixed and Mobile
- d. Transport and Utilities
- e. Construction
- f. Education – Universities, Academies and Schools
- g. Hospitality – Hotels and Resorts

Our Services and Solutions

- a. System Audits
- b. System Design Authority all aspects of security audits
- c. Security surveys, including critical national infrastructure
- d. Technology sourcing and supply to meet Systems Design
- e. Project and Program Management with Turnkey Deployment
- f. 24x7 Network Operations Centre
- g. Engineering Services
- h. Consultancy and Professional Services
- i. Operational effectiveness audits
- j. Training
- k. Surveillance
- l. Executive Protection / Close Protection
- m. Crisis Management
- n. Conflict Prevention
- o. Threat / Risk Analysis
- p. Facility / Residential Security
- q. Aviation Security Technology Areas
- r. Mobile, Wi-Fi, Wireless and Microwave Access Networks
- s. Fixed Line National Networks
- t. Fixed Line Metro Access Networks
- u. Regional POPs, Base Stations and Access Points
- v. OLO Interconnect / IP Backhaul
- w. Telemetry Systems
- x. Corporate & Community Networks
- y. Supporting BSS, OSS, Inventory & GIS Systems
